# Devendra Maharshi

+91 7357651857 | devendramaharshi005@gmail.com | Linkedin | Github

## Technical Skills

**Frontend:** React.js, JavaScript (ES6+), TypeScript, HTML5, CSS3, Redux, Tailwind CSS
**Testing:** Jest, React Testing Library
**Backend:** Node.js, Express.js, RESTful APIs
**Authentication:** OAuth2, JWT, MSAL
**Tools:** Git, Docker, Azure DevOps, Jfrog, NPM
**CI/CD:** Experience with development processes and deployment
**Performance:** Browser debugging, performance optimization
**Soft Skills:** Problem-solving, teamwork, translating business requirements

## Experience

**React.js Developer**                                                                              June 2023 – Present
*Celebal Technologies*                                                                                   *Jaipur, India*

- Developed highly-responsive, web-based user interfaces using React.js and TypeScript, significantly improving user experience and application performance.
- Built reusable components and front-end libraries, implementing best practices and design patterns for future scalability.
- Utilized Redux for state management, ensuring efficient data flow and component interaction across large-scale applications.
- Implemented advanced optimization techniques such as code splitting and lazy loading, resulting in improved load times and overall application responsiveness.
- Integrated OAuth2 and JWT for secure authentication and authorization, ensuring protected user sessions across the application.
- Collaborated with the backend team to design and consume RESTful APIs, ensuring seamless data integration.
- Conducted thorough code reviews and mentored junior developers, promoting best practices and improving overall team efficiency.

**Web Developer Intern**                                                                       July 2022 – August 2022
*Wisflux Academy Summer Internship Program*                                                              *Jaipur, India*

- Developed a React-based image compression web application with optimized load times.
- Implemented RESTful API responses in Express.js for efficient data handling.
- Utilized Git for version control and collaborative development.

## Projects

**Trading Chatbot** | *React, TypeScript, React Native WebView*                                  Apr 2024 – Aug 2024

- Built a real-time chatbot with React and TypeScript, supporting LTR and RTL languages.
- Implemented responsive design for seamless Web and mobile functionality.
- Developed an admin dashboard with reusable React components and JWT authentication.

**Call Analytics Dashboard** | *React, TypeScript, Tailwind CSS*                                 Aug 2024 – Oct 2024

- Created an interactive dashboard with real-time charts using React and TypeScript.
- Integrated RESTful APIs for dynamic data visualization and analysis.

**Contract Management System** | *React, Redux, TypeScript*                                      Nov 2023 – Jan 2024

- Developed a secure system with role-based access control using React and Redux.
- Implemented document handling for various file formats using reusable components.

## Education

**Central University of Rajasthan**                                                             Kishangarh, Rajasthan
*B.Tech in Computer Science and Engineering*                                                      *July 2019 – May 2023*
CGPA: 8.10

**Prerna Public School**                                                                                Sikar, Rajasthan
*Senior Secondary (BSER Ajmer)*                                                                             *June 2018*
Percentage: 87.20%
